## DREAM A LITTLE DREAM OF ME 2023 COLLECTION

For the Spring Summer Collection Felipe created a homage to all the dreamers bringing awareness to how important it is to have dreams and hopes. The inspiration for the collection comes from silver screen images of sirens Joan Crawford, Tippi Hendren and Elizabeth Taylor, the collection also references Chilean and Colombian traditional garments. The colour palette is inspired by the Nordic Summer sky when this collection was first thought up and materialised by observation of the beautiful colours and tones during the Swedish summers. The collection evokes a touch of breezy summertime and focuses on the lighter side of life through the use of materials such as Silk Jacquard, Organza, Lightweight Nylons, Technical Nylon, Silk Crepe and Duchess Silks.

The sheer fabrics and cutaway designs show a playful take on Summer coats and t-shirts while the trousers are inspired by Italian Capri Summer, all focusing on the simplicity of linear design and movement of fabrics.

This is the brands second collection that encourages inclusion and reminds that garments are genderless and can be worn by all.
