SPRING SUMMER 2022

resurgence

For Spring Summer 2022, Danshan rejoice in a resurgence of ceremonial celebrations following a year of enclosure and desolation.

Appreciating the simplicity in life and nature, Danshan bring unity and togetherness in an emotional vortex which creates balance and harmony.

A treasury of sensitive materials married with the translucency in fabrics represent the delicacy that is of life. The calmness and tranquillity of nature's forestry inspire the jacquard pattern, while the mellow oceanic waves inspire the embroidery. These considered processes are communicated through soft tailored suits, tunics and shackets, embodying the ceremonial occasion of coming back together.
