2023 S/S VIRTUAL FASHION

AMORPHOUS STUDIO®

Our design concept is incubated in the thinking of traditional fashion industry in the post-epidemic era, with virtual fashion as the main tone, rooted in Chinese oriental culture and oriental philosophy, and we are committed to building China's first metaverse virtual fashion house.

We hope to use digital virtual technology to reshape the form of fashion, and explore the possibility of interaction and integration between the public and the virtual world through fantasy virtual clothing design, and think about the relationship between fashion and human beings.
